Aimed at children between the ages of eight and twelve, "Seeing Things" is a wonderful introduction to photography that asks how photographers transform ordinary things into meaningful moments. In this book, acclaimed and beloved photographer Joel Meyerowitz takes readers on a journey through the power and magic of photography: its abilities to freeze time, tell a story, combine several layers into one frame and record life's fleeting and beautiful moments. The book features the work of masters such as William Eggleston, Mary Ellen Mark, Helen Levitt and Walker Evans, among many others. Each picture is accompanied by a short commentary, encouraging readers to look closely and use their imagination to understand key ideas in photography such as light, gesture, composition-and, ultimately, how there is wonder all around us when viewed through the lens. Joel Meyerowitz (born 1938) is an award-winning photographer whose work has appeared in over 350 exhibitions in museums and galleries around the world. He is a two-time Guggenheim Fellow, a recipient of both National Endowment for the Arts and National Endowment for the Humanities awards and a recipient of the Deutscher Fotobuchpreis. He has published over 15 books and divides his time between New York and Italy.
