"Pressestimmen 'Ethnopharmacology is a remarkable book that
comprises cutting-edge research from a range of world-class
authorities from many countries across the world. This makes it one
of the most authoritative books ever written on this subject and on
phytotherapy in general'....'in my opinion, the real appeal of the
book is the diversity of the subjects covered, which include the
comparative and quantitative methods of ethnopharmacological
research; biodiversity, conservation, and ethnopharmacology;
ecopharmacognosy; the use of novel nuclear magnetic resonance
techniques in natural product research; and ethnopharmacology and
intellectual property rights'.....'Ethnopharmacology is indeed a

valuable book for natural-product researchers, especially those interested in novel approaches for uncovering new leads for the development of essential medicines from plant and animal sources. I have no doubt in my mind that it will serve the purpose for which it is intended: a cutting-edge text meant to equip postgraduate students in pharmacy, pharmaceutical sciences, and other related disciplines, anywhere in the world, with sound knowledge of the newly developing field of ethnopharmacology' **Bioscience, July 2016**
Über den Autor und weitere Mitwirkende **Professor Michael Heinrich**, UCL School of Pharmacy, UK. **Dr Anna K. Jäger**, Department of Drug Design and Pharmacology, University of Copenhagen, Denmark."

Ethnopharmacology and natural product drug discovery remains a significant hope in the current target rich lead poor scenario many modern drugs have origin in traditional medicine and ethnopharmacology traditional indian
