Zero Waste est une démarche positive qui suppose la participation de toutes les composantes de la société pour :- modifier nos modes de production, afin de limiter le recours aux ressources naturelles et à l'énergie, d'allonger la durée de vie des produits et de favoriser la réutilisation des matériaux ;- développer la réutilisation et le réemploi des produits et matériaux, par le développement des circuits courts, de l'écologie industrielle et de la réparation ;- collecter de manière séparée le plus grand nombre de produits et matériaux valorisables.À ce jour (mai 2014), Zero Waste a recueilli l'adhésion de 191 organisations (associations et PME) dans 56 départements, de 99 élus ou candidats et de 2 100 particuliers.Pourquoi un livre ?- Pour interpeller les décideurs politiques et économiques, et les inciter à passer à l'action. Les pionniers du mouvement Zero Waste ont déjà permis à certaines collectivités de réduire de 80 % le volume de déchets résiduels, en optimisant le recyclage et la valorisation organique (telle la commune toscane de Capannori, 46 000 habitants).Ces activités ont entraîné la création d'emplois locaux dans la réparation et le réemploi, sans surcoût pour la collectivité.- Pour démontrer à tous les citoyens la possibilité de la transition vers le zéro déchet. De nombreux exemples et témoignages seront intégrés au fil de l'ouvrage : écoconception, expériences de compostage collectif et individuel, ressourceries, etc.
